

Eastern Heating & Cooling Council

in association with

Luce, Schwab & Kase

Training for the HVAC Professional

ECM Motors Training

This four-hour seminar is designed for the entry-level and seasoned service technician. It will provide the technician with a basic understanding of how a variable speed motor works and how to diagnose and troubleshoot various issues. Topics will include the differences between a motor problem compared to a control circuit problem, utilizing the "Go or No Go" method and the solid-state control method. The class will also explore some duct designs and airflow issues that are problematic with today's duct systems. **Technicians earn 4 NATE CEHs toward all specialties for completing this course and/or 2 BPI continuing education credits.**

Course Topics Include:

- Constant Airflow
- Static Pressures
- Pressure Limitations
- Filter Loading
- PWM Frequency
- RMP
- Torque
- Electronic Inverter
- Power Shedding
- Back or Counter EMF

**Location: Luce, Schwab & Kase,
Lakewood, NJ**
