

Eastern Heating & Cooling Council

In cooperation with

Luce, Schwab & Kase

Training for the HVAC Professional

Electricity for HVAC Technicians

This seminar provides the student with an understanding of electricity as it applies to basic HVAC equipment operation. Topics include how electricity is made and how electrical current moves within a circuit. The class will explore the operation of different types of electrical equipment utilized in HVAC systems. Students will also learn how to use diagnostic tools including a voltmeter, ohmmeter and ammeter as a basis for understanding how to learn to troubleshoot and diagnose electrical problems in HVAC systems. **Technicians who attend this course will earn 6 NATE CEHs toward re-certification for all specialties.**

Course Topics Include:

- Alternating Current
- Conductors
- Insulators
- Switches
- Reading Schematics
- Motor Operation
- Motor Wiring
- Series Circuits
- Parallel Circuits
- Transformer Operation
- Inductance
- Counter EMF
- Capacitance
- Electrical Circuits
- Voltmeter
- Ohmmeter
- Ammeter

Class Fee Covers:

- Course Manual
- Lunch
- Certificate of Attendance

**Location: Luce, Schwab & Kase –
Lakewood, NJ**

Date: February 8, 2012

Time: 9:00 a.m. – 4:00 p.m.

Registration Fee: \$150

EHCC Member Fee: \$100
